

# Rotary drive-on lifts make jobs easier all the way around.

For easier vehicle spotting you need a driveon lift. Create significant value for your shop when it comes to increased efficiency for general maintenance and multi point inspections - especially when you add our Shockwave technology for rises and descents that are twice as fast.

### The most expensive lift is the one that doesn't work.

You can trust the fact that no brand of lift performs better or longer than Rotary. A lower price doesn't necessarily mean you're getting a lift for less. Our lifts are investments that pay for themselves quickly and boost your business for years to come. Rotary lifts cost less to operate, have a consistent track record of uptime with lower repair costs and are manufactured with 95 years of legendary quality.

Rotary lifts are engineered, tested, and supported with pride in Madison, IN USA. Crafted by people who love what they do delivering their best work to you – our customer.

Choose the right lift for your shop.

Rotary Lift.

### GENERAL SERVICE RUNWAY LIFTS ENGINEERED FOR CARS, TRUCKS and COMMERCIAL VEHICLES

# Discover the competitive, exclusive features, the variety of lifting configurations, and available accessories that only Rotary offers!

Fit and lift whatever is driven on the road. Rotary drive-on lifts accommodate a variety of vehicle classes by easily pulling up onto the lift with confidence. Open front and open through designs allow service technicians to move freely around the vehicle. Taller rise heights mean less stooping below a beam structure. With available lift accessories you can handle the additional business that will come your way. Do more work than just lift a vehicle. Do it all with a certified Rotary lift in your shop.

### Supercharge SM14 Series lifts with exclusive SHOCKWAVE™ power

SHOCKWAVE<sup>™</sup> equipped lifts are the fastest lifts in the world, accelerating productivity and increasing service orders per bay. Designed specifically for bays where service speed is essential.

SCAN THIS VIDEO CODE TO LEARN ABOUT SHOCKWAVE LIFTS

#### Shockwave<sup>™</sup>equipped lifts feature:

- Spotline™ motion activated spotting laser. Center vehicles in bays accurately.
  Patented DC power system gives you an inexpensive and reliable operation
- while using two standard Group 24 batteries.<sup>+</sup>
- The built in battery charger uses 110v power, eliminating the need for expensive 220v wiring, and, if your shop loses power, SHOCKWAVE-equipped lifts keep on working.

Watch your productivity increase, the number of service orders increase and be shocked at the increase in revenue!
